

PAI Anti-Ice System

Designed to pretreat areas that need to remain open during extreme winter weather, anti-icers are used to apply liquid that prevents snow and ice from bonding to the pavement.

PAI Anti-Ice System for Pickups

Ideal for use by municipality fleets, landscapers, and private contractors.

- ⊕ Designed to fit light duty and medium duty pickup trucks ½ ton or greater
- ⊕ Available in 100 to 400 gallon capacities
- ⊕ 6.5 HP Gas engine
- ⊕ Space saving design fits between wheel wells and allows extra space for bagged material

Highlights

- › Single lane application
- › Five ports with three-way adjustable nozzles give unlimited spray patterns and application rates
- › Jet tank agitation keeps your liquid mixed at all times
- › Curb-side-mounted hose reel allows you to spray sidewalks without entering traffic
- › Adjustable spray gun with interchangeable nozzle tips allows you to spray different material types
